PROFILE

Self-taught designer from Jaipur with a B.Tech in computer engineering. Leads Communication Design at Razorpay across Payments, RazorpayX and POS: brand films, launch campaigns, landing pages and product imagery, held together by one visual system. Builds the AI production tools the design team uses on live campaigns. Previously Associate Director, Marketing Design at Grofers (now Blinkit).

EXPERIENCE

Razorpay

Oct 2021 - Now

Communication Design Senior Manager, Bengaluru

Leads Communication Design across Payments, RazorpayX and POS: brand films, keynote videos, landing pages, sales decks, social campaigns and product imagery. Established a deck design language now used across more than ten product lines and business units.

Grofers (now Blinkit)

Mar 2015 - Oct 2021

Associate Director, Marketing Design, Gurugram

Integrated advertising for recurring sale events, social campaigns and app visual identities. Hired and developed the creative team and directed external production partners.

SELECTED WORK

Trial of the Century

A Panchatantra-style courtroom film that turned payslip confusion into a pop-culture moment for the HR community.

Backing India's Start-Up Champions

81 television films, a newspaper front page and 200+ social posts for 20 founders, with no cameras, sets or lights.

Break To Build

A 100% AI experiment in making a TVC: founders photographed once, then broken, bent and built into cinematic films.

Back in the Ring

A boxing-film trailer, a parallax landing page and a playable game, built end to end in-house to relaunch Netbanking.

Magic Checkout Landing Page

An immersive landing page that lets visitors experience what Magic Checkout does, instead of reading a list of features.

Agentic Commerce Engine Launch Video

A 100% AI-made launch film for the Razorpay Agentic Commerce Stack, made for GFF 26.

MoneySaver Export Account

A launch video and digital media strategy for the MoneySaver Export Account, made entirely with AI design tools.

Passport For Your Product

A launch campaign whose entire design identity was built with a new AI workflow, then taken to YouTube, LinkedIn and Meta.
